

**Mrs Despina Kallidromitou** is a Civil Engineer; co-founder and shareholder of EPSILON with worldwide working experience. Her expertise covers Civil, water, environmental, systems engineering, project management and economics, international projects and EC contracts. Since 1991 she has frequently served the EC as an Expert in a series of short-term missions linked to water resources, environment and GIS projects in Europe and internationally. She has a Civil Engineering Vordiplom (B.Sc), Bochum Technical University (1982), Civil-Hydraulic Engineering Degree, National Technical University of Athens (Dipl.-Ing., 1985), Systems engineering postgraduate studies, University of Wisconsin, Milwaukee, USA (1987), Optimization and Decision Support Systems in Civil Engineering, Herriot Watt University Edinburgh, UK (1989), MBA, National Technical University Athens (2007), ISO 9000/14001 TUV Auditor. She has managed more than 200 major national and international projects on subjects such as: hydraulics, water resources, environment, mathematical environmental modeling, sustainable environmental management, environmental economics, decision making systems, remote sensing and GIS. Examples include the hydraulics and environmental engineering design for the Canoe Slalom Olympic Games 2004 and GIS navigation and data application contract for the C4I Athens Security project of the Athens Olympic Games 2004. She has authored 100+ scientific publications in water resources, environment and GIS technologies.
