

Name Ronald van der A

Position Senior scientist

Title Dr

Gender Male

Ronald van der A obtained his PhD at the University of Leiden while working at the Netherlands Institute for Space Research (SRON). Since 1997 he has been employed by the Royal Netherlands Meteorological Institute, where he is now working as senior scientist and project manager for the Climate Research department. He is involved in the analysis of satellite data for SCIAMACHY, GOME-2 and OMI. His expertise is data assimilation and emission estimates from satellite observations. He was project manager of the EU-project AMFIC, ESAproject TEMIS and part of the management team of GMES project PROMOTE.

Currently, he is coordinating the ESA project GlobEmission and the EU-FP7 project MarcoPolo and he is involved in the Ozone-CCI project (ESA) and the MACC project (Copernicus). He is also member of the Ozone Science Advisory Group of WMO. He has been author of more than 50 peer-reviewed papers.
